---

## PROFESSIONAL SUMMARY

---

Full-stack web developer with 8+ years of experience building and maintaining production websites and web applications for digital agencies and enterprise clients across the US and Philippines. Proficient in WordPress, PHP, and modern JavaScript frameworks. Comfortable owning projects end to end — from architecture and development to server deployment, SEO, and ongoing maintenance. Track record of delivering responsive, scalable, and user-friendly platforms for clients in digital marketing, HR/payroll, legal tech, real estate, and financial services.

## SKILLS

---

**Languages:** HTML5, CSS3, JavaScript, PHP

**Frameworks:** React.js, Next.js, Laravel, CodeIgniter, Bootstrap

**CMS & Builders:** WordPress, Webflow, Wix, Squarespace, Umbraco, GoHighLevel, Framer

**Infrastructure:** AWS, DNS management, Cloudflare, server deployment, Linux

**Analytics & SEO:** Google Analytics, Google Tag Manager, Hotjar, SEMrush, on-page SEO

**Tools:** Jira, Trello, Git, Canva, Claude, AI Prompt Engineering

## PROFESSIONAL EXPERIENCE

---

### Web Developer

Dec 2024 – Present

[Underdog Digital](#) — [Digital Marketing Agency](#) | United States · Remote · Full-time

- Build and maintain websites for 25–30 active clients primarily in WordPress, with additional work in Wix and Squarespace, ensuring mobile responsiveness, fast load times, and cross-browser compatibility
- Apply on-page SEO best practices including metadata optimization, heading structure, keyword placement, and internal linking to improve organic visibility across client sites
- Develop custom Next.js and React.js solutions and integrate third-party APIs to extend client site functionality beyond standard CMS capabilities
- Leverage AI tools and prompt engineering to accelerate development workflows, automate content tasks, and deliver faster turnarounds for clients
- Collaborate directly with account managers and clients to translate briefs into fully deployed, production-ready web solutions

### Web App Developer

May 2023 – Dec 2024

[USA Notary](#) | Virginia, United States · Remote · Full-time

- Architected and launched a full-stack online notary platform, handling database design, PHP/Laravel backend, JavaScript frontend, and cloud deployment end to end
- Integrated third-party APIs for identity verification, document signing, and payment processing to support a complete notary workflow
- Delivered a secure, scalable application handling real user transactions, with a clean UI designed to minimize friction in the notarization process
- Managed DNS configuration, Cloudflare setup, and server deployment on AWS to ensure reliable uptime and performance
- Maintained the production environment including server management, performance monitoring, and ongoing feature development post-launch

### Web Developer

Jul 2023 – Feb 2024

[Adapt](#) — [Digital Marketing Agency](#) | United States · Remote · Contract

- Designed and developed responsive websites for 15–20 concurrent clients across WordPress and Webflow in a fast-paced agency environment with tight delivery timelines

- Optimized site performance through image compression, caching configuration, and code cleanup, improving page speed scores across client sites
- Implemented client-specific features including custom forms, booking integrations, and content layouts using WordPress and PHP

## WordPress Expert

Oct 2021 – Jul 2023

[Digital Radar Marketing — Digital Marketing Agency](#) | United States · Full-time

- Built and customized 20+ WordPress and Webflow websites for a diverse client base, covering theme development, plugin customization, and fully responsive design
- Delivered client projects independently from discovery to deployment, managing timelines, client communication, and technical execution
- Maintained active sites with regular updates, security hardening, performance monitoring, and plugin compatibility management

## Senior Assistant Developer

Oct 2019 – Apr 2023

[Metro Pacific Investments Corporation](#) | Philippines · On-site · Full-time

- Developed and maintained web applications for in-house use and for subsidiaries of one of the Philippines' largest conglomerates, including an HRIS, Shareholder's Database, and RFP/Accounting system
- Built role-based access control and approval workflows into each system, ensuring data integrity and appropriate access for different user levels across the organization and its subsidiaries
- Collaborated with HR, finance, and operations stakeholders to gather requirements and translate business processes into functional, maintainable web applications
- Managed server deployments, DNS configurations, and Linux-based environments to keep internal applications running reliably

## Web Developer

Jul 2018 – Oct 2019

[Osdoro — Asia's #1 Coworking Platform](#) | Singapore · Remote · Full-time

- Designed and developed custom WordPress websites for Osdoro's coworking platform, focusing on space listing functionality, lead capture, and user engagement
- Specialized in theme and plugin customization to meet platform-specific business requirements and support growth across multiple locations
- Delivered responsive, visually polished sites optimized for discoverability and conversion using SEO best practices and GTM tracking

## EDUCATION

---

### Bachelor of Science in Information Technology

2015 – 2019

STI College Caloocan
